

# Google Gemini AI Primer Workshop

This workshop is designed to give non-technical users a practical, hands-on introduction to Google's AI ecosystem. Participants will learn how to use **Google Gemini** effectively, create and use **Gems (custom AI experts)**, craft better prompts, generate and edit images with the **Nano Banana** model, and explore two often-overlooked free tools from Google: **NotebookLM** and **Google AI Studio**. Workshops are capped at 5 participants to ensure personal guidance and interaction.

## Pricing:

- 30-Minute Session: R1000 total (≈ R200 per person if 5 attend)
- 1-Hour Session: R2000 total (≈ R400 per person if 5 attend)

## 30-Minute Session (R1000)

A fast-track introduction to Gemini and core tools.

- Quick-start with Gemini basics – logging in and trying your first chat.
- Prompting essentials – how to get better results with clear, structured prompts.
- Live demo: image generation & quick edit using Nano Banana.
- Awareness: what Gems are and how they can be used.
- Awareness: NotebookLM for summarizing documents (demo or screenshot).
- Wrap-up and Q&A, with links to resources for further exploration.

## 1-Hour Session (R2000)

A full guided workshop with deeper demos and hands-on practice.

- Gemini basics – interactive Q&A; and writing exercises.
- Prompt crafting: before/after examples, iteration, and refinement.
- Creating and using Gems – both pre-made and a simple custom Gem.
- Hands-on image generation with Nano Banana: creating, editing, blending.
- NotebookLM demo: upload a document and query it with citations.
- Intro to Google AI Studio: a look at the playground for building AI-powered tools.
- Wrap-up, extended Q&A, and resources for practice.

## Outcome:

Participants will leave with a working understanding of Google Gemini AI, practical prompting skills, confidence to generate and edit images, and awareness of additional free Google AI tools to continue learning.
